Education

University of Nevada, Reno | Reno, NV

Bachelor of Science in Computer Science and Engineering with Mathematics Minor

Expected Graduation date: Spring 2025 | 3.5 GPA | Honors Scholar | Presidential Scholar

Experience

UNR Lost and Found System (August 2024 - May 2025) - For my senior capstone project I worked within a team of 4 to create a lost and found website for UNR. We have used Flask for the backend and Angular for the front end, along with python and PostgreSQL for database management.

DeLaMare Library Makerspace Student Worker (June 2023 - Present) - I currently work on the UNR campus in the engineering and mines library and have been promoted since my initial starting position. I am responsible for knowing how to work all of the machines and tools we have to offer in the makerspace, as well as being able to teach patrons and offer advice. I have worked on 3D scanning projects for UNR's Natural History Museum, laser cutting projects for the president of the university, as well as helped patrons with a variety of academic and personal projects.

Summer Maintenance Worker (Summer 2022) - I worked with a small team to prepare classrooms, school buildings, and vehicles for the return of students in the fall throughout the Antelope Elementary School District. This involved a lot of detailed cleaning and organization, as well as miscellaneous tasks such as painting and collecting recycling.

NASA Astrobiology Internship (Academic Year 2019 - 2020) - I participated in a NASA internship class working in partnership between my school, Lassen Volcanic National Park, and select NASA scientists. Alongside teams of classmates, I performed year long experiments in the lab with associated fieldwork. Our main focus was on microbes living in unique hydrothermal features that mimicked conditions

Skills

- **Software** - Photoshop, Illustrator, Fusion360, Cura, PreForm, EngraveLab, SureCutsALot, Dremel Digilab, Tinkercad, Artec Studio, Artistic Digitizer, Docker, PostgreSQL, OpenCV, Angular, Flask, Adobe Photoshop, Adobe Illustrator
- **Programming Languages** - Experience with C, C++, Java, Python and familiar with postgresQL, ROBOTC, Scheme, HTML, CSS, JS, TS
- Arduino, raspberryPi, VEX robotics, laser cutters, CNC mill, PCB mill, vacuum former, vinyl cutters, embroidery and sewing machines, 3D printers, resin printer, 3D scanners, soldering, power tools
- **Platforms** - Microsoft Office, Google Workspace/ G Suite, Github
- **Operating Systems** - Windows, MacOS, ROS2 (Humble and Melodic)
- A+ Cisco Certification
